```c
1.  #include <cs50.h>
2.  #include <stdio.h>
3.  #include <stdlib.h>
4.
5.  int main(int argc, string argv[])
6.  {
7.      // If it isnt correct
8.      if (argc != 2)
9.      {
10.         printf("Usage: ./fahrenheit <number>\n");
11.         return 1;
12.     }
13.     // Print the fahrenheit that is correct
14.     printf("F: %.1f\n", atof(argv[1]) * 9 / 5 + 32);
15. }
```
